Den,

It is an interesting reading and very technical for a letter from a Senator. Although Dimock is referenced in Item 16, where there were alleged "missteps" by EPA, I don't believe Region III has had any missteps that I am aware of that could be referenced here. I am sure there is always some criticism of our actions, where we might not have done something correctly in others' eyes, but nothing I would consider a misstep. To the contrary, I believe we have worked hard to keep to the mission of protecting the citizen's health first and foremost. I also don't believe any of our statements from the Region draw any specific conclusions toward the fracking industry causing the presence of the analytes we are investigating at Dimock. I would hope, if we have any reply from Region III, those clarifications are made.

Rich

I thought you folks should be aware of this. The letter is long but there is reference to Dimock on the last page and more importantly reading helps put some of the questions and issues we face in perspective. den.
